

When you open your copy of the book, you will find the book is divided into two parts. The first part is the book's introduction, and the second part is the book's main body.

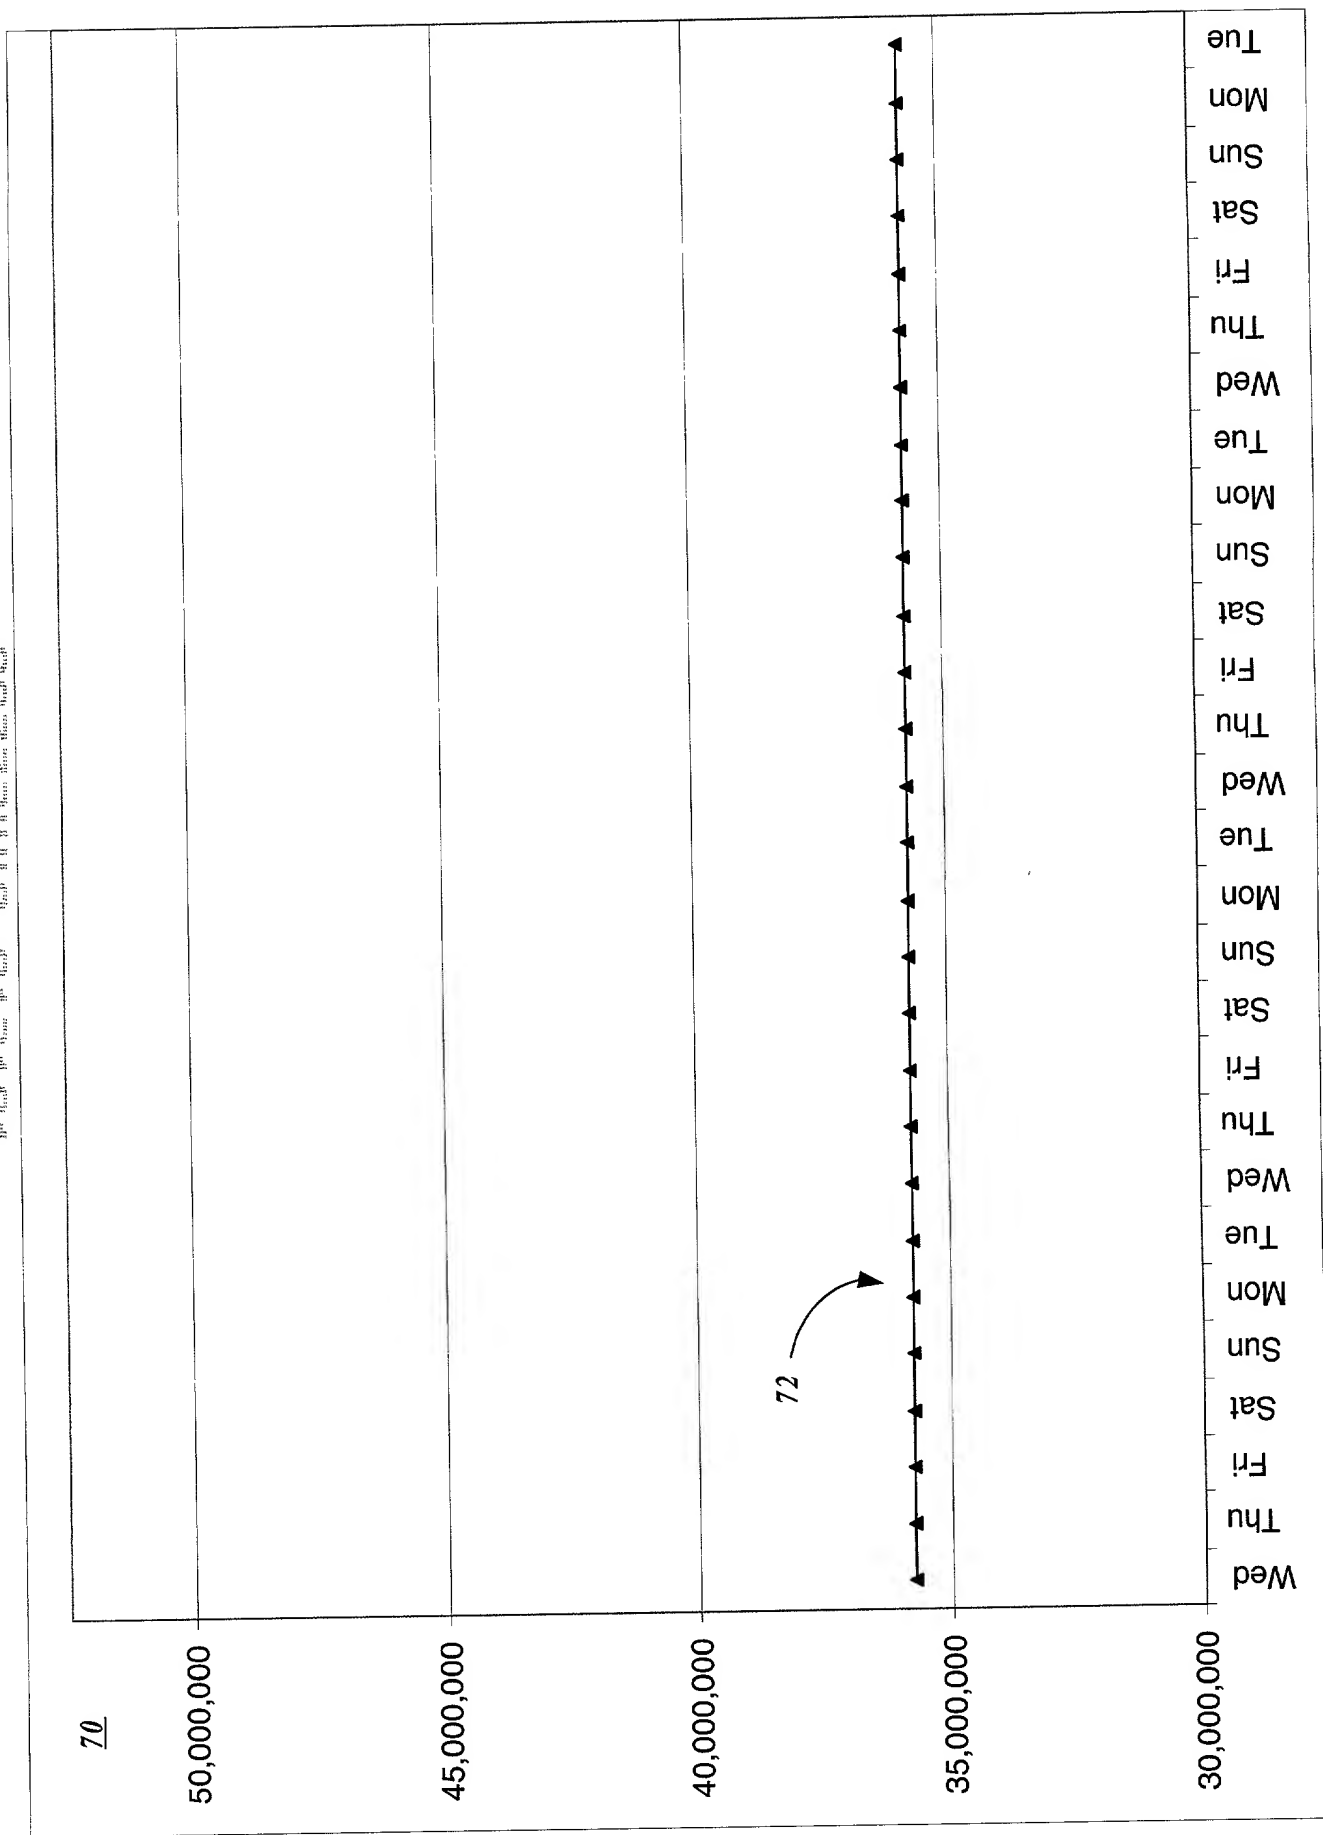

FIGURE 1

Figure 2 shows the variation of the total number of cases over time for the different regions. The data is presented in a line graph with the x-axis representing time (days) and the y-axis representing the number of cases. The graph shows a clear upward trend in the number of cases over time, with a significant increase in the number of cases starting around day 70. The data is presented for the different regions, with the total number of cases shown in the top panel and the number of cases for each region shown in the bottom panel.
